

POLARIS CORPORATE RISK MANAGEMENT

Private Client and Family Office Services

At Polaris Corporate Risk Management, we help high-profile, high-net-worth individuals and family offices safeguard their most vital assets—family, wealth and reputation.

High-profile, high-net-worth individuals and family offices face a unique set of risks and security threats. Polaris Corporate Risk Management helps clients reduce their exposure to risks, and to navigate crisis situations efficiently and discreetly.

We provide scalable and multi-dimensional cyber, investigative, intelligence and protective services that are *customized to meet our clients' needs*.

By bridging the digital and physical worlds, Polaris offers holistic security programming, striving to protect clients from risk at all angles. The Polaris approach is *transparent and flexible*, as we welcome the client's input and instruction at each stage of the process – from setting up clear initial expectations, to establishing a practical action plan for meeting any client's needs, through execution of action items.

These services include inner circle due diligences, tangible asset monitoring, family protection, emergency and crisis response, travel security and cyber security assessments.

Don't let your success ruin your sense of security -

Strengthen your risk posture with POLARIS.

Cyber Risk Management

Cybercrimes are growing more sophisticated – it's time your *cyber security* does too. Through media monitoring, deep and dark web scraping, and cyber security program assessments, Polaris helps you stay ahead of cyber risks.

Investigations & Vetting

Polaris' investigative services set the industry standard. When you're not sure who to trust, Polaris' due diligence investigations offer clarity – which is especially important as you staff your home and estates.

Intelligence Services

In this age of fast-flowing media, you need a provider that works as smart as it does hard. *Polaris' Intelligence Team* employs best-in-class media tools to screen for relevant data, which is compiled into actionable threat briefings and reports.

For more information on Polaris' services, visit www.polarisrsk.com.

Family Protection

To protect your most vital asset – the wellbeing of you and your family, Polaris can provide executive protection agents, both armed and unarmed. These agents are available as needed, or can be embedded across your properties. Security-trained drivers, moreover, can help keep you secure away from home.

Tangible Asset Monitoring

Polaris' protective services go beyond bodily protection; Polaris coordinates with onsite household management and protection agents to monitor your tangible assets, protecting art, precious stones, and other valuable items through regular checks across different estates, limiting liability and potentially lowering insurance premiums.

Investigations & Vetting

Success attracts both earnest new colleagues and bad actors, and you need a reliable method to distinguish between the two. Polaris can thoroughly vet all members of your household staff to ensure that your home and office is secure. In our years of experience, we've seen the criminal or litigation records of staff go undetected, putting both assets and individuals at risk. Polaris won't let such details slip through; with regular background checks we can make sure you're surrounded by the right people. We always have your best interests in mind – trust us to find others who do as well.

Cyber Risk Management

Our team, with its proven cyber security expertise, can augment your security programming, creating cyber policies based on comprehensive assessments of your current cyber security infrastructure. Our assessors ensure that your network and environment meet the industry standard. When necessary, Polaris also provides effective and surefooted Cyber Security Incident Response, to limit the damages—financial, reputational or otherwise—of any breach, hack, or other cyber intrusion. To limit these incidents, Polaris utilizes deep social listening and dark web tools to detect potential dangers not visible on conventional search engines.

Travel Security

Travel security is an integral part of any risk profile. Polaris integrates state-of-the-art technology, alerting systems, and local assets on the ground to ensure the safety of high-profile individuals. Our procedures are discreet – designed to limit you and your travel companions' visibility and exposure without sacrificing speed and practicality.

Crisis Management & Response

Polaris personnel deliver comprehensive crisis management and emergency response services. These services include, but are not limited to, natural disaster response and preparedness, theft prevention and response and medical emergencies. Polaris can work with clients to develop protocols for crises like these, and more.
